Guangzhou Guose Intelligent Technology Co.,Ltd.

BRAND INTRODUCTION

AUTONOMOUS R & D TEAM

Guojue Intelligent Technology Co., Ltd. is committed to scientific and technological innovation. There are top design teams and manufacturing plants. The comfortable travel and accommodation products bring more possibility of travel and lifestyle.

HIGH -EFFICIENCY, HIGH QUALITY, HIGH COST PERFORMANCE

Do not play the foundation, apply all the terrain, do not destroy the ecological environment, no construction waste, ecological and environmental protection. 40 days in the factory, installation and disassembly, integrated transportation, 2 hours on -site installation, no secondary renovation, shortening the construction cycle, equipped with a full smart home appliance control system, panoramic view, and self -traffic.

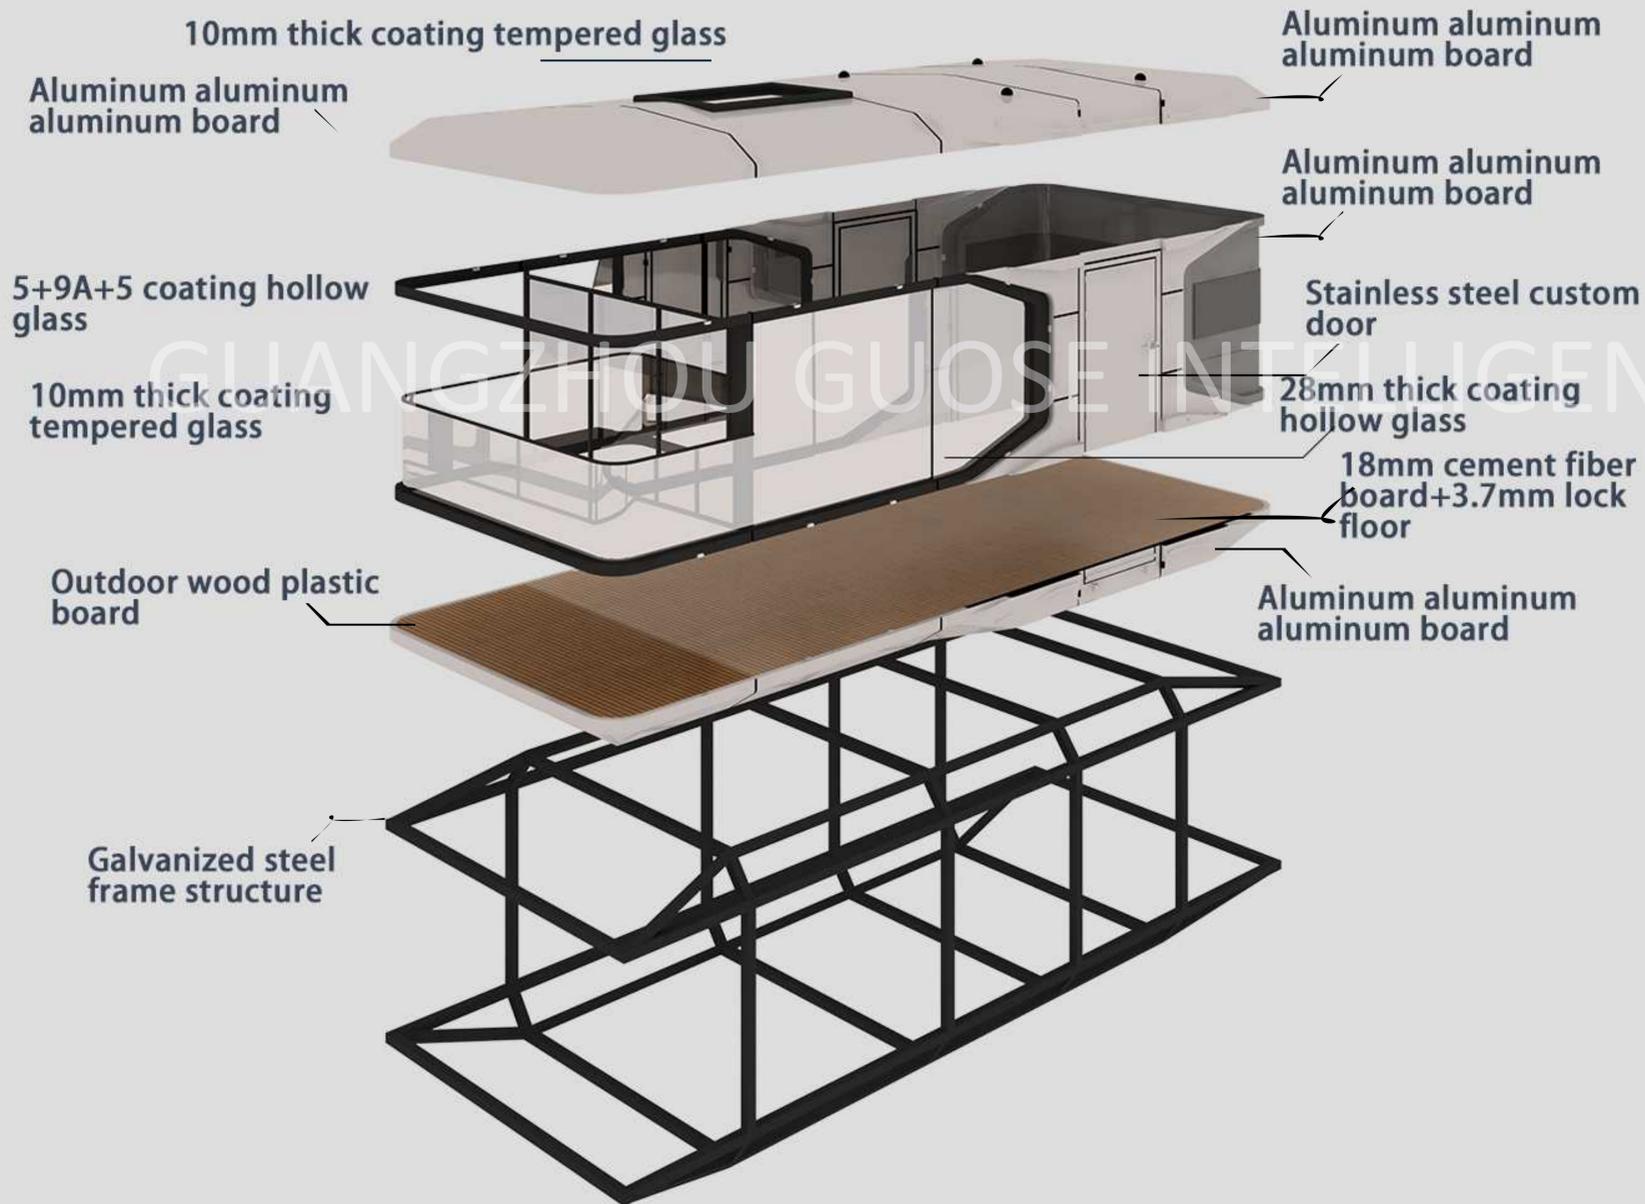

PRODUCT QUALITY AND SERVICES ARE GUARANTEED

The main structure of the product is a special steel structure with strong structure design, which strengthens windproof and shock resistance. The main material uses high -intensity composite materials and external decorative galvanized plates, with high safety and strong protection. Professional sofflight designers create space design plans for customers. The professional planning team conducts planning and design according to the actual situation of the project and customer requirements, including consulting, overall planning, space design, and supporting facilities. Construction diagram, etc.

HONORS AND CERTIFICATES

All -in -one structure system

1. Super strong steel mixed, 100 years of quality

The main structure of the product is a special steel structure with strong structure design, which strengthens windproof and shock resistance. The main material uses high -strength composite materials and aluminum alloy shells, with high safety and strong protection. Typhoon above level 12, anti -corrosion prevention and moisture. Special thermal insulation and cold design, without fear of environmental conditions, can be minimum to minus 30 degrees.

2. Quality design, sucking and drainage

Prefabricated hostels, moving at any time, convenient and fast, personalized design in line with young people's curiosity about novelty, bringing a unique living experience. Through the regional culture of attractions, the national color integrated cabin uses healthy and high -quality environmental protection materials to build a convenient and fast green ecological house that can breathe, which is a building that makes people happy and enhances happiness, and meets people's demands in the landscape.

3. Overall prefabrication, fast installation

The intelligent integrated cabin is realized in the factory for 40 days of production, installation and disassembly, integrated transportation, 2 hours on -site installation, no secondary decoration, shortening the construction period, equipped with a full smart home appliance control system, a panoramic view, and its own traffic.

4. Unlimited terrain, ecological development

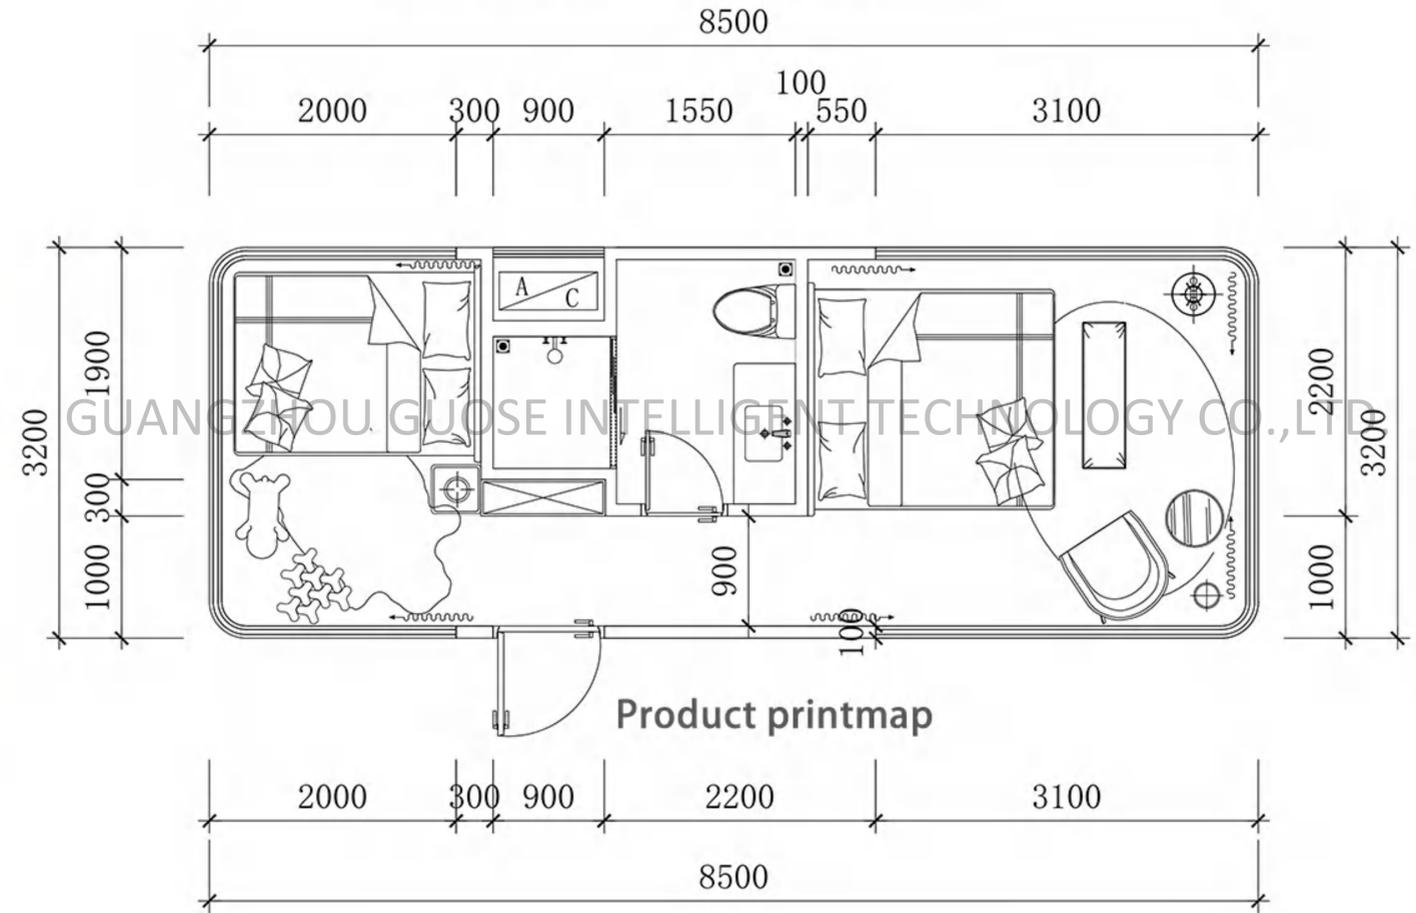

The all -in -one cabin does not play the foundation. It is suitable for all terrain, applicable mountains, seaside, and even sea. It does not destroy the ecological environment, no building waste, and ecological environmental protection. Further saving the foundation costs and reducing the requirements for geological conditions.

PRODUCT SERIES

Note: The product continues to be upgraded and iterates.

GS-A01

| | | | |
|------------|-------------------------|---------------------|----------------------|
| MODEL | GS-A01 | MAXIMUM NUMBER | 4-6 PEOPLE |
| DIMENSIONS | L8500mm、W3200mm、H3200mm | MAXIMUM ELECTRICITY | 12KW |
| LAND | 27.2m ² | INDOOR GROUND LOAD | 500KG/m ² |

PRODUCT FEATURES

The space compartment uses a metal shell with a sense of technology and a single cabin with a 270-degree tempered glass; the viewing view of the viewing balcony is unobstructed; the whole house adopts Xiaomi intelligent control system, high quality, low energy consumption, and full intelligence. The products have been put into production in batches, and the product testing waterproof, insulation, insulation, and materials have reached international standards.

PRODUCT DISPLAY

A VIEW OF THE INTERIOR OF THE CAPSULE

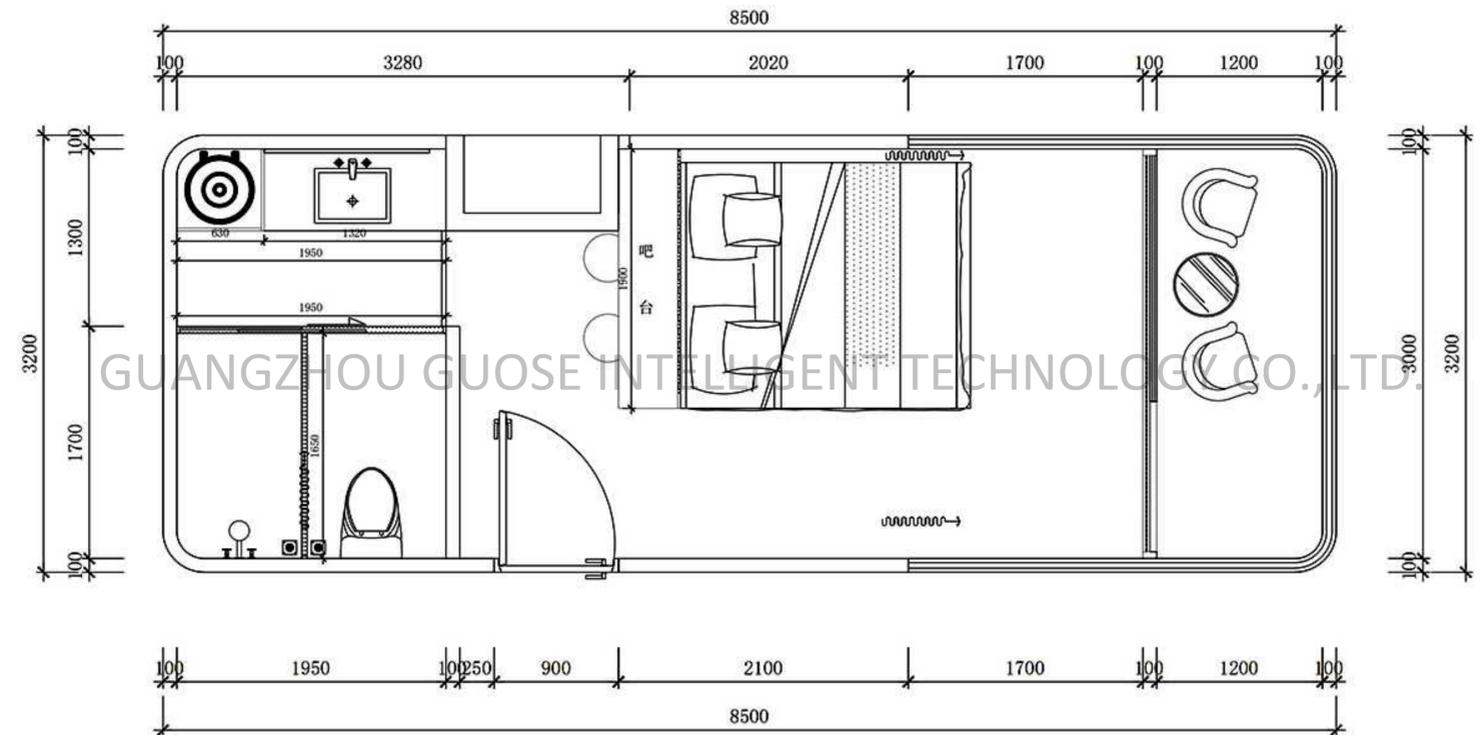

The cabin body adopts open design, decoration style and pattern can be customized according to customer requirements.
